

# JD Air Tax Credit and Rebate Resource Guide for HVAC Systems\*

1

## Understanding Your Proposal

A traditional estimate from JD Air will contain an outdoor unit and an indoor unit. The energy efficiency ratings are based on the match-up of both of these units.

Locate the model number of each unit listed on the estimate.

HVAC Add-Ons / Quantity: 1

**BOSCH Heat Pump 20 SEER, Single-Phase, 3 Ton - BOVB-36HDN1-M20G**

Product Specifications. BtuH Cooling. 34,600. BtuH Heating Input. 34200. Depth. 29 1/8. EER. 13.0. HSPF. 10.5. Height. 24.938". Liquid Conn. 3/8". Max. Fuse Size. 45. Min. Circuit Amps. 26.3. Motor Type. ECM. Nom. Tons. 3. Phase. Single. Refrigerant. R410A. SEER. 20. Suction Fitting. 3/4". Volts. 208/230. Width. 29-1/8". Wt. Lbs. 151. Shipping Weight. 151.00. Shipping Width. 29.00. Shipping Length. 29.00. Shipping Height. 25.00.

## Understanding Efficiency Ratings

Many tax credits and rebate programs base eligibility on SEER2, EER2, and HSPF2. Confirm that your equipment meets the minimum requirements.

Efficiency ratings will be located on the AHRI Certificate. Navigate to the [AHRI Directory](#).

Directory of Certified Product Performance

\*At JD Air, we strive to provide valuable information to our clients regarding potential tax credits available for certain equipment purchases. However, it's important to note that we do not confirm or promise eligibility for these credits. This document is not intended as tax advise.

We highly recommend consulting with a qualified tax specialist or accountant to determine if the equipment in question qualifies for any tax credits based on individual circumstances and current tax regulations. Additionally, please note that tax laws and sustainability incentives can change. We recommend confirming the timeliness and accuracy of the referenced materials, as we cannot ensure their validity.
